

SKIN MEASUREMENT TRAINING DAY

The Skin Measurement Training Day is an opportunity to hear from leading experts about a wide range of skin measurement techniques, how they work, how best to use them and how to design a study for success. The training day will have opportunities to see the different techniques in operation as well as some time to get 'Hands on' with them and discuss your particular measurement needs. There is a small charge of £50 plus VAT for attending the day. Attendees will get a 5% discount on equipment purchased by 31st December 2018.

DATE & LOCATION

Wednesday 20th June 2018 at Hilton Gardens Inn, Brindleyplace, Birmingham. To book your place [click here](#) .

BENEFITS

- Benefit from understanding the very latest technique in scientific analysis of skin condition
- Gain an opportunity to discuss your specific areas of interest with people who are experts in the field
- Have a chance to meet the EnviroDerm manufacturers and distribution personnel to discuss how we can support you
- See an extensive range of measurement techniques in action
- Get some practical experience with some of the measurement

techniques

PRESENTATIONS

DIANA KHAZAKA

General Manager, Courage & Khazaka GmbH

Diana will provide insight into the measurement techniques available for investigating mechanical properties, hydration properties and skin barrier quality and how they can be applied effectively for research and product development. Other skin measurement parameters from the Courage & Khazaka range will be available on the day for demonstration, hands on experience and discussion on how you can apply them effectively in your work area.

PROF GERT NILSSON

Director, WheelsBridge AB

Gert will inform us about the tissue viability imager measurement technique and how it can be used for microcirculation mapping of skin and oral tissue. He will provide insight into the different applications. The further toolbox applications will be available for demonstration, hands on experience and discussion on how they might benefit your work.

DR ARTUR BEZUGLY

Dermatologist & Director, Taberna Pro Medicum

Artur will present on the high frequency ultrasound measurement, providing background on the technique, imaging the skin and how this can be used to measure different aspects of the skin. He will provide insight into the different application fields and how high frequency ultrasound might benefit the work you are involved in. There will be an opportunity to see the equipment in action and to have discussion on how best to use the equipment.

DR JONATHAN CROWTHER

Director, JMC Scientific Consulting Ltd.

Jonathan will use his extensive experience to go through the process of designing studies to support a product. He will go through the stages of defining consumer need, exploratory testing, designing and executing the study and finally looping back to determine whether the study met the initial needs. He will pull out the different considerations that might need to be made along the way. Jonathan will also be available for questions and discussion about study design and using measurements to gain understanding of products and the skin.
